

**INTERLINK ELECTRONICS, INC. ANNOUNCES \$550,000 ADD-ON ORDER  
FROM MAJOR MEDICAL EQUIPMENT MANUFACTURER**

*Expands Company's Position within the Medical Equipment Market*

*May 4, 2023, 6:00 AM PDT*

IRVINE, CA – (Business Wire) - **Interlink Electronics, Inc.** (NASDAQ: LINK), a world-leading trusted technology partner in the rapidly advancing world of human-machine interface devices, sensors, membrane switches and other cutting-edge technologies, is pleased to announce that it has received a \$550,000 add-on order for its force-sensing resistors from a global medical device company. These sensors will be incorporated into the customer's product as a key safety device.

"We are delighted that our valued customer has placed this order," said Steven Bronson, Interlink's CEO, President and Chairman. "It validates our belief that our force-sensing resistor technology has an important role to play in the medical equipment field, and we continue to explore this and other markets."

**About Interlink Electronics, Inc.**

Interlink Electronics is a world-leading trusted technology partner in the rapidly advancing world of human-machine interface (HMI) devices, sensors, membrane switches and other cutting-edge technologies. In addition to standard product offerings, Interlink utilizes its expertise in materials science, manufacturing, firmware, and software to produce in-house system solutions for custom applications. For 38 years, Interlink has led the printed electronics industry to commercialize its patented Force Sensing Resistor® technology. It has supplied some of the world's top electronics manufacturers with intuitive sensor and interface technologies. It also has a proven track record of supplying technological solutions for mission-critical applications in a diverse range of markets - including medical, automotive, consumer electronics, telecommunications, and industrial control - providing standard and custom-designed sensors that give engineers the flexibility and functionality they seek in today's sophisticated electronic devices.

Recent acquisitions have expanded the Company's portfolio of products and services into new areas. SPEC Sensors and KWJ Engineering, purchased in December 2022, offer industry-leading design and manufacture of electrochemical gas-sensing technology for industry, community, health and home, providing custom solutions, advanced sensors, innovative products and unique services with uses in fields such as carbon monoxide and ozone detection and air quality monitoring. Calman Technology Limited, acquired in March 2023, brings over 25 years of experience in the design and manufacture of membrane keypads, graphic overlays and label product, with customers in fields such as medical devices and defense technologies and operations across the UK and Europe.

Interlink serves an international customer base from our corporate headquarters in Irvine, California; our Global Product Development and Materials Science Center and distribution and logistics center in Camarillo, California; our advanced printed-electronics manufacturing facilities in Shenzhen, China, and Irvine, Scotland; and our proprietary production and product development facility in Newark, California.

## **Forward-Looking Statements**

*This release contains “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be generally identified by phrases such as “thinks,” “anticipates,” “believes,” “estimates,” “expects,” “intends,” “plans,” and similar words. Forward-looking statements in this press include statements about our acquisition program, our projected annual revenue run rate, and the effects of recent acquisitions, including contributions to our products, manufacturing operations and the markets we serve. Forward-looking statements are not guarantees of future performance and are inherently subject to uncertainties and other factors which could cause actual results to differ materially from the forward-looking statement. These statements are based upon, among other things, assumptions made by, and information currently available to, management, including management’s own knowledge and assessment of the company’s industry, R&D initiatives, competition and capital requirements. Other factors and uncertainties that could affect the company’s forward-looking statements include, among other things, the following: our success in predicting new markets and the acceptance of our new products; efficient management of our infrastructure; the pace of technological developments and industry standards evolution and their effect on our target product and market choices; the effect of outsourcing technology development; changes in the ordering patterns of our customers; a decrease in the quality and/or reliability of our products; protection of our proprietary intellectual property; competition by alternative sophisticated as well as generic products; continued availability of raw materials for our products at competitive prices; disruptions in our manufacturing facilities; risks of international sales and operations including fluctuations in exchange rates; compliance with regulatory requirements applicable to our manufacturing operations; and customer concentrations. Additional factors that could cause actual results to differ materially from those anticipated by our forward-looking statements are under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our most recent Annual Report (Form 10-K) or Quarterly Report (Form 10-Q) filed with the Securities and Exchange Commission. Forward-looking statements are made as of the date of this release, and we expressly disclaim any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.*
